Annual Crop Assessment

2018 Vintage

An analysis of varietal tonnage and prices of grapes grown on the British Columbia mainland and used in the production of wine in the 2018 vintage.

Note to Reader

“This data is unaudited and is produced for industry information only”

Last year the BC Wine Grape Council committed to the task of reporting the BC wine grape harvest by June 1st each year. Investment in and maintenance of a robust data base has made this possible. BC mainland wineries are required by regulation to report and pay levies on tonnage purchased to the BCWGC, creating a comprehensive set of information to draw from. Wineries have voluntarily submitted the pricing data which has been added to this report.

The BCWGC Crop Report Sub-Committee meets annually to review the report and make recommendations for the following year. Revisions to the format this year include:

- standardized naming protocol of varieties
- pricing table to include both metric tonne and short ton pricing
- review of draft report by the sub-committee to ensure accurate representation of information.

The data collected for this report is held in strict confidence and individual grower/winery information is not divulged to anyone. While this specific report is not audited, the BCWGC is required to have an annual audit and this is carried out by the Grant Thornton LLP accounting firm.

The 2018 vintage was an average growing year, with an average bud-break and slightly early bloom, followed by normal summer heat tempered by smoke cover. Researchers at UBCO and at Summerland Research and Development Center have made some advances in early smoke taint detection, aiding in mitigation of this problem. Growing Degree Days (GDD) for all areas were close to 20-year averages and harvest timing was average, with yields slightly above average, and excellent quality reported for most varieties.

Kathy Malone, Chair
BC Wine Grape Council

Kate Durisek, Executive Director

Pricing Analysis

Notes on Pricing Collection Method

Winery members who did not record an internal purchase price for their own grapes were instructed to use a “no value” indicator of \$1.00. These records were removed from the Average Price calculation presented in the tables below. There were 1070 entries of this type which equated to 13,869.4 tons or (32%) of the total tonnage volume.

Prices were filtered to exclude values outside of the standard deviation range of \$1,200 - \$5,000.

There were 35 entries valued at \$1,200 and below of which 33 were reported as an internal price for grapes grown by the reporting winery. The 2 crops purchased from a third party in this price range equated to 15.5 tons or (0.0004%) of the total tonnage volume.

There were 5 entries valued at \$5000 or above of which 4 were reported as an internal price for grapes grown by the reporting winery. The single crop purchased from a third party in this price range equated to 5.3 tons or (0.0001%) of the total tonnage volume.

The values in the tables below reflect the Average Price Per Ton of the remaining tonnage once these outliers were removed.

Red Crop Values

*** EXCEPT TONNAGE REPORTED WITH NO VALUE OR OUTSIDE STANDARD RANGE**

Tonnage Analysis

Notes on Tonnage Collection Method

Crop information was collected through a proprietary online member portal where winery members entered tonnage report details including grower, vineyard location, varieties per vineyard location, and price per variety. In instances where members submitted a paper or excel based report to the council, the BCWGC entered the crop information on behalf of the winery member. Reports were collected until April 30, 2019; reports received after that date were not included.

The data presented in the tables below includes a summary of all data that was collected regardless of the prices reported for each crop.

Percentage of Vinifera, Hybrid, Labrusca Production

Color	Type	Total Tonnage	Percentage of Total
White	Vinifera	20,945.1	97.87%
	Hybrid	455	2.13%
	Labrusca	0	0.00%
Red	Vinifera	20,880	97.88%
	Hybrid	451.5	2.12%
	Labrusca	0.6	0.003%
