

2014 B.C. Wine Grape Acreage Report

August 2014

Similkameen Valley

The following report was compiled in May, June & July of 2014 and comprises acreage up to and including 2014 plantings. We have endeavoured to gather information from as many vineyards as possible in B.C. and estimate the data comprises 95% of the B.C. wine grape acreage.

The report is used to predict shortages or surpluses of future grapes and as a planning tool for research project funding, marketing, and winery or vineyard investments.

Information compiled by:
Mount Kobau Wine Services
Email: Bremmer@MtKobau.bc.ca

Funding for this project was provided by Agriculture and Agri-Food Canada and the B.C. Ministry of Agriculture through programs delivered by the Investment Agriculture Foundation of B.C. and in part by the BC Grapegrowers' Association, the BC Wine Grape Council and the BC Wine Institute.

Agriculture and Agri-Food Canada, the B.C. Ministry of Agriculture and the Investment Agriculture Foundation of BC, are pleased to participate in the delivery of this project. We are committed to working with our industry partners to address issues of importance to the agriculture and agri-food industry in British Columbia. Opinions expressed in this report, are those of the report author, Mount Kobau Wine Services, and not necessarily those of the Investment Agriculture Foundation, the B.C. Ministry of Agriculture or Agriculture and Agri-Food Canada.

This report is available on the websites of the B.C. Grapegrowers' Association, the B.C. Wine Institute and the B.C. Wine Grape Council at: www.grapegrowers.bc.ca , www.winebc.com or www.bcwgc.org

ACKNOWLEDGEMENTS

The report was prepared by Lynn Bremmer of Mount Kobau Wine Services with reviews and edits provided by staff/ members of the B.C. Grapegrowers' Association.

We would like to express our sincere thanks to John Schreiner for his assistance with some of the critical information gathering. He can be contacted at <http://johnschreiner.blogspot.ca/> North Vancouver, BC.

Overview

August 1, 2014

- There are 10,260 acres (4,152 hectares) of wine grapes in B.C.
- 49 % White grapes / 51 % Red grapes;
97 % Vinifera grapes / 3 % hybrids.
- Top ten varieties in order of acres:
 - Merlot
 - Pinot Gris
 - Pinot Noir
 - Chardonnay
 - Cabernet Sauvignon
 - Gewurztraminer
 - Cabernet Franc
 - Syrah
 - Riesling
 - Sauvignon Blanc
- There are 254 licensed grape wineries in B.C. *(11 have 'commercial' licenses with the ability to source grapes anywhere in the world; the rest are 'land-based' wineries producing wine from 100% BC grapes).*

There are at least 17 'Virtual' wineries in B.C. *(not licensed but produce wine under another winery's license. They may or may not own land, can source grapes anywhere, and sell the wine under their own name)*
- There are 929 vineyards in B.C. (both winery and independently owned), with acreage distributed as follows:
 - 84.1 % in the Okanagan Valley
 - 6.4 % in the Similkameen Valley
 - 6.6 % in the Coastal Areas
 - 2.9 % in Other Interior areas of B.C.
- 67.2 % of wine grape acreage is winery owned or leased and 32.8 % is independent grape grower owned or leased.
Average winery vineyard size is 28.02 acres (11.34 ha).
Average independent grower vineyard size is 5.96 acres (2.41 ha)

B.C. WHITE WINE GRAPES

Osoyoos	+ 7.2 %	+ 2.3 %
Peachland / Summerland	+ 5.6 %	+ 14.1 %
Oliver	+ 4.3 %	+ 2.7 %
Penticton / Naramata	+ 4.0 %	+ 13.1 %
Gulf Islands	+ 0.6 %	- 18.7 %
Okanagan Falls	- 2.0 %	+ 10.2 %

SUMMARY

August 2014

- The overall grape acreage in B.C. continues to increase although at a slower rate, with the largest increases in Lake Country/Vernon, Kelowna, and Peachland/Summerland areas. The lower Mainland/Fraser Valley, Vancouver and Gulf Islands are decreasing in acreage, partly due to failing experimental plantings and removal from unsuitable areas. The Similkameen Valley is an anomaly with future growth anticipated. The Oliver/Osoyoos area remains the main source of acreage with over 50% of plantings.
- Pinot Noir has replaced Chardonnay as the third most planted grape variety in B.C. Cabernet Franc has replaced Syrah as the 7th most planted grape with Syrah now in 8th place. The largest percentage increases were in Muscats, Riesling and Pinot Noir grape plantings. Merlot continues to lose ground in planting, probably due to the very large amounts planted in previous years.
- Merlot plantings predominate in Oliver, Osoyoos, Penticton/Naramata, Kaleden and Similkameen;
 - Pinot Noir plantings predominate in Kelowna, Lake Country/Vernon, Vancouver/Gulf Islands, Lower Mainland/Fraser Valley, Okanagan Falls, Summerland/Peachland and other interior areas of B.C.;
 - Cabernet Sauvignon plantings predominate in Osoyoos and Similkameen;
 - Chardonnay plantings predominate in Oliver and Okanagan Falls;
 - Gewurztraminer plantings predominate in Kelowna, Kaleden and Summerland;
 - Pinot Gris predominates in Lake Country/Vernon, Penticton/Naramata and Vancouver/Gulf Islands.
- New wineries continue to open with a trend towards 'Virtual' wineries. These 'wineries' produce wine under another winery's license. They may or may not own land, can source grapes anywhere and sell the wine under their own label.
- Winery owned acreage continues to increase with sales of independent grower land more likely to be purchased by an existing winery, the grower starting their own winery or a buyer with the intent to open a winery. The average independent grower acreage continues to decrease in size from 9.46 acres 15 years ago to 5.96 acres today. The average winery acreage continues to decrease as well as smaller wineries open from a high of 40.68 acres 15 years ago to 28.02 acres today.
- When winery expansion is desired, 26% of wineries will purchase or lease more than 1 vineyard. As a winery's sales increase there is often a desire to be less dependent on independent growers for their grape supply with many wineries purchasing or leasing vineyards in various areas to ensure a consistent supply of grapes grown in their preferred areas. This also gives a winery more control over viticultural practices.
- Other B.C. regions are still in an exploratory phase at this time, experimenting with various grape varieties. It remains to be seen if these areas will be successful in establishing grape/wine industries.
