STREAM 2: WINE GRAPE REPLANT OVERVIEW

PROJECT LENGTH

Successful Stream 2 applicants will have up to 24 months from time of approval to complete their project.

[Register for the information webinar - Nov 20 @ 12:00 PM]

FUNDING AMOUNTS

Fields *without* Production Insurance Plant Loss Claim	Fields *with* Production Insurance Plant Loss Claim	Funding limit per Farm Operation
Nursery stock[1]: cost-shared 50% plant purchase and one-time licensing/plant royalty fees	**Nursery stock:** cost-shared 25% plant purchase and one-time licensing/plant royalty fees	**Min:** one (1) contiguous acre **Max:** 20 acres or 15% of existing acreage, whichever is greater **Funding cap:** up to a maximum of $750,000 (duration of the program)

[1]Producer-to-producer sales (including rootstock, scion, plants) are eligible under ERP. Any producer-to-producer sale (whether originally sourced from a commercial nursery and/or grown at a home nursery) will be cost-shared at 50%.

What does funding limit mean?

- Each farm operation can apply for a minimum of one (1) contiguous acre per project up to a maximum of 20 acres or 15% of existing perennial food crop acreage (leased and owned), whichever is greater.
- The total funding available for each farm operation over the duration of the program is capped at a maximum of $750,000.

What's a cost-shared ratio?

- The cost-sharing ratio represents the proportion of eligible Total Project Costs contributed by both the applicant and the funder. For the Enhanced Replant Program, the cost-shared ratio depends on whether the applicant has been paid a Production Insurance Plant Loss Claim or has a Plant Loss Claim in progress for each field being replanted.

Plant Loss Claims

- All applicants are required to indicate if they have been paid a Production Insurance Plant Loss Claim from January 1, 2023 onward or have a Plant Loss Claim in progress for the field/block being replanted. Cost-share ratios for applicants will be adjusted based on Business Risk Management Program claims at each planting and/or removal/renewal location.
- Fields or blocks that production insurance has **NOT PAID** a Plant Loss Claim, or no active Plant Loss Claim is under consideration:
  - **Nursery Stock:** applicants will receive a 50% cost-share (reimbursement) for nursery plants and one-time plant royalty and/or licensing fee(s), when purchased from a commercial nursery.
- Field or blocks that production insurance has **PAID** a Plant Loss Claim (from January 1, 2023 onwards), or an active Plant Loss Claim is under consideration for the field/block being replanted:
  - **Nursery Stock:** applicants will receive a 25% cost-share (reimbursement) for nursery plants and one-time plant royalty and/or licensing fee(s), when purchased from a commercial nursery.
  - Producers with active Plant Loss Claims are not eligible for removal/renewal funding.
- Applicants who indicate they are enrolled in Production Insurance will have their information (including Production Insurance Policy Number, Physical Address of planting/removal location and Land Titles Parcel Identification (PID) number) sent to the Ministry of Agriculture and Food Business Risk Management Branch to verify claim status.

BOOK A CALL

Starting on November 18, 2025, you can book a 10-minute phone consultation with an IAF staff member to discuss your ERP application. **Visit the IAF program website for more details.**
